2017 PREVENTIVE DRUG LIST

Preventive medications are used for the prevention of conditions such as high blood pressure, high cholesterol, diabetes, asthma, osteoporosis, heart attack, stroke and prenatal nutrient deficiency.

You may not have to pay a copay, a coinsurance (the percentage you pay after you meet your deductible) and/or a deductible (the amount you pay before your plan starts to pay) for preventive medications.

Please check your plan's prescription drug list and plan documents to understand how your plan covers preventive medications. You can refer to myCigna.com for a complete and up-to-date drug listing for your plan. You can also use the Prescription Drug Price Quote tool on myCigna.com to view and compare drug prices.

The following is a list of generic and brand-name preventive medications, arranged by type of condition. Talk with your doctor when choosing the preventive medication that is right for you. Also talk with your doctor about available generic preventive medications (listed as uncapitalized medications and/or in parentheses). Generic medications have the same active ingredients, dosage form, quality and strength, as their brand-name counterparts and may provide additional savings for you. This list is subject to change and may not include all preventive medications that your plan covers. Please refer to your plan's prescription drug list for a complete and up-to-date drug listing.

If you have questions

Please call the toll-free number on the back of your Cigna ID card. We're here to help.

Offered by: Cigna Health and Life Insurance Company, Connecticut General Life Insurance Company, or their affiliates. 885985 d All Value/Adv 10/16 © 2017 Cigna.

Preventive Drug List

Please note, brand-name medications start with a capital letter, and generic medications start with a lowercase letter. If a brand-name medication has an equivalent generic available, it will be listed next to the brand name in parentheses.

Some plans may cover specialty medications at different benefit levels. Refer to your enrollment materials for more information.

Actonel (risedronate sodium) Atelvia (risedronate sodium) Binosto Boniva (ibandronate sodium) etidronate disodium Evista (raloxifene) Forteo Fortical (calcitonin-salmon) Fosamax (alendronate sodium) Fosamax Plus D Miacalcin

Prenatal Vitamins

All prescription strength prenatal vitamins are considered preventive

Check your plan materials for formulary placement of branded prenatal vitamins

Cigna reserves the right to make changes to this drug list without notice. Your plan may cover additional medications; please refer to your enrollment materials for details. Cigna does not take responsibility for any medication decisions made by the doctor or pharmacist. Cigna may receive payments from manufacturers of certain preferred brand medications, and in limited instances, certain non-preferred brand medications, that may or may not be shared with your plan depending on its arrangement with Cigna. Depending upon plan design, market conditions, the extent to which manufacturer payments are shared with your plan and other factors as of the date of service, the preferred brand medication may or may not represent the lowest-cost brand medication within its class for you and/or your plan.

Health benefit plans vary, but in general to be eligible for coverage a drug must be approved by the Food and Drug Administration (FDA), prescribed by a health care professional, purchased from a licensed pharmacy and medically necessary. If your plan provides coverage for certain prescription drugs with no cost-share, you may be required to use an in-network pharmacy to fill the prescription. If you use a pharmacy that does not participate in your plan's network, your prescription may not be covered, or reimbursement may be limited by your plan's copayment, coinsurance or deductible requirements. Refer to your plan documents for costs and complete details of your plan's prescription drug coverage.
